

Iberostar Waves Cozumel

June 28 – July 5, 2025, \$1999.00 pp

Iberostar Waves Cozumel is a diver's delight. Located at the far end of the island, guests can take advantage of the picturesque and unobstructed views, calm waters, and incredible proximity to the reefs. The Caribbean village atmosphere, palm tree swing, and dive center keep our guests coming back.

DRESSSEL DIVERS COZUMEL **Dive Center & Shop**

Cozumel is ranked among the **world's top scuba diving destinations** for a reason: each dive is among the best on the planet. Cozumel's crystal clear waters provide incredible visibility, as if nature knows that so much beauty deserves to be seen as clearly as possible on every dive.

Enjoy FREE NITROX! With this destination being so popular, divers doing multiple dives daily, we offer free nitrox to help keep you going. The beauty and abundant marine life of Cozumel's scuba diving have been extensively documented by famous oceanographers, such as Jacques Cousteau. Experience wonders for yourself!

Whale Shark Excursions : Tuesdays, Thursdays and Saturdays from early June to mid-September

Riviera Maya Diving Excursions : The Riviera Maya coastline offers scuba diving with more of the most impressive turtles on one single dive than on all your dives locally could ever add up. This incredible turtle alley is also **a drift dive allowing you to float effortlessly from one turtle to the next**. The very same current that carries you also ensures great dive visibility. Before diving with the turtles we do a slightly deeper dive on the Mama Viña wreck. In general you swim around the wreck, losing some depth every circle and those that want to can swim through a very spacious room with several wide exits. Many Barracudas, jacks and interesting schools of other fish usually hang around, especially in the vicinity of the mast. Generally there is a lot of current making this a wreck dive very different from usual. : Every Thursday
